

Inspect this home at #30 Pollution Place.

Try to find items and problems in this house and yard that may not be good for the Earth. Circle these problems. You will see many items that your family uses everyday. Some of these items you will find you will still need to use but it's important that you dispose of them properly. You also will see some pollution problems that many of us can easily solve. You should be able to find 30 potential pollution problems. Certain words like caution and precaution are on some labels. These words mean the product is bad for the Earth. Read the precautions carefully!
