

Magazine Exchange

If you reuse magazines, you will save paper, printing and mailing costs and this will help the Earth.

1. Ask your parents to give you magazines that they no longer want.
2. Take the magazines to school and place them in a magazine exchange corner that your teacher has created.
3. Choose a magazine that your parents don't already receive and take it back to them.
4. When they are finished reading it, take it back to the magazine corner.

You may want to ask your school librarian if a magazine corner can be added to the library.
