

From the mountains, to the prairies, to the oceans  
white with foam.....

### We Need Stronger Rules to Protect Parks.

Many city, state, and national park budgets are being cut. That means there is not enough money to take good care of the parks. Industries are trying to use national wildlife refuges, forest, and other special places to make money by oil drilling, logging, and mining. These activities can upset the balance of nature in our public lands therefore hurting our parks and our Earth. Public parks everywhere need financial support. Tell your friends and family to ask your governmental leaders to support and protect our parks.

## Make a Power Poster

It's amazing how what kids think and speak out about can influence very important people. Kids can make a difference by sending their power posters to our political leaders who can help protect our parks.

### Here's How to Make Your Poster

1. On legal-sized paper have students write the words "Save Our Parks." Fill in the letters with bright colors.
2. Below the title draw bright colorful park pictures such as beach, forest, desert, mountain, prairie/meadow, and tropical state and national parks, as well as your local community parks. Include drawings of some of the plants and animals that need these parks as their home. You might want students to "Google" the words "photos of parks" to get some ideas. Students can also check the school library to find books about parks.
3. Post students' Power Posters on the walls of your school, church, home, etc.
4. Scan some of their posters and [email them to KSE](#). We will place them on our web site. Of, if you prefer, mail them to [Kids for Saving Earth, 37955 Bridge Rd, North Branch, MN 55056](#).
5. Next send some of your posters to your governmental leaders. You might send some to your mayor, your governor, your state and US senators and representatives, and even the president. [Click here to find addresses.](#)

I think the  
desert is  
HOT!

Deserts are  
really cool!
