

## Eco Activity Day

1. Cut out the post card
2. Print your return address on the empty side of the card on the left top corner.
3. Keep it handy in your desk to use when you find a water waster. You might want to bring a few home to have handy as well.
4. When you find a store or other facility that has a leaky faucet or toilet that "runs", check off which fixture continues to "run". Find the address of the store that is wasting water, place it and a stamp on the postcard and send it to them.
5. Email KSE at [KSE@kidsforsavingearth.org](mailto:KSE@kidsforsavingearth.org) to let us know the name and location of the business you sent it to.
