

Become an Amigos de La Selva

(Friends of the Jungle)

Most schools in areas surrounding the [Kids for Saving Earth Rainforest](#) are in very poor communities where the schools have limited funding. It is extremely important that the children and parents in these areas understand why they must protect the rainforest. One effective way to stop rainforests from disappearing is for us to help these local residents work to protect them.

Kids for Saving Earth hopes you will continue to support our land acquisition, protection and education program. Perhaps you could add "5 extra bucks" (or more) to support our Amigos de La Selva program. We use this funding to help support the Organization for Tropical Studies (OTS) education programs that deal directly with schools in the communities surrounding the Kids for Saving Earth Rainforest protection areas. To donate "extra bucks" [click here](#) and look for the words: "I'd also like to support the Amigos de La Selva program by contributing a few more bucks."

Would you like to communicate with Costa Rican students in these rainforest areas? [Click here](#) to email us if you are interested. Give us your contact information.
