

HOW FLASH

Everyday during a family vacation to our cabin in Show Low, AZ in 2025, I saw that our side of the forest was covered with pieces of litter that flew out of garbage trucks, could've been left behind by people taking walks and some from a construction job. So to help keep the forest and the Earth clean, I went outside to clean up litter on our side of the forest. I disposed of it all properly by putting trash in the trash can, recyclables in the recycling bin and stuff like wood and anything else from the construction job in the trailer of the construction company who was doing the job. And during a family adventure one day of our vacation, I cleaned up pieces of litter that were laying around all 3 places that we went to. I disposed of it all properly. Just like I always do when I'm cleaning up litter, I disposed of it all properly and correctly by putting trash in the trash can and all recyclables in the recycling bin and I brought the plastic grocery bag to the store drop off bin. This was one of my biggest missions this year to help clean up litter.
